## DESIGN FEATURES

### Features

- Use AkzoNobel material.
- Super Anti-corrosion
- Epoxy powder coating 200-250um,
- Baking varnish over 200°C,

Free wedge nut, reduces the stem bending forces and at the same time enables it to be easily replaced.

The more compact new cap, reduces the water retention areas in order to reduce the risk of bacterial growth.

One piece stainless steel stem in for better resistance to axial load and to with stand higher operating torques.

Three locking tab for bayonet system prevents self-dismantling.

Dust guard integrating three O-ring shape, prohibiting the introduction of foreign bodies at the stem.

Male guiding system with composite sliding skate reduces the wear of the wedge against the body, allowing a smooth functionality and a longer life time of the valve.

Triple seal at the operating stem to ensure tightness with the test of time (2500 cycles).

New male composite sliding skate technology ensuring a low operating torque even under high differential pressure and preventing damage or corrosion generated by the friction.

# APPLICATION SCENARIO

Industrial water application

Power plant

Sea water desalination

Water treatment

Water supply and drainage

HAVC

Food and drug

Water transport

## COMPANY FACTORY

01

21 years of professional experience

03

Independent research and development team  
28 top senior professional researchers

05

Q: How long does it take to receive the goods?  
A: It depends on the destination and the shipping method. For example, air shipping is faster than sea shipping.

Q: How do I know if the goods are safe?  
A: We have a strict quality control system. RKSfluid has a professional inspection team to ensure the quality of the goods. We also provide a warranty for the goods.

Q: How do I know if the goods are authentic?  
A: RKSfluid has a professional inspection team to ensure the quality of the goods. We also provide a warranty for the goods.
