

RKSfluid®

Proven Technology-Superior Features-Legendary Value

2PC Stainless Steel Full Port Floating API6D Flange Ball Valve with ISO5211 Mounting Pad(CF8/CF8M/WCB) 150LB~300LB

Valve Floating Ball Valve With the rapid development of science and technology, production technology and continuous improvement of product structure, quickly developed into one of the main valve. The ball is widely used in long-distance pipeline, oil refining, power, paper, chemical, pharmaceutical, steel, municipal, water and other industries, the oil pipeline in the area plays an important role. The main characteristics of valve seal itself reliable, compact, easy maintenance, simple structure, with the spherical sealing surface often in closed state, the media can not easily be eroded, easy operation and maintenance for natural gas, solvents, water, acid and other general working medium.

RKSfluid Valves is one of the professional Ball Valve Manufacturer in China. We supplies: Floating ball valve, trunnion ball valve, metal seated ball valve, threaded end ball valve, butt welded ball valve, Forged steel ball valve etc, We can manufacture and supply ball valve according to your requirements Main material of the products are A105, WCB, C5, WC6, WC9, CF8, CF8M, 316 and so on. Tops Valve design by the standards of API6D, ASME, ANSI, JIS, DIN, BS, GB, etc.

Application:

Applicable Temperature: -20°C ~ +180 °C

Main Materials: WCB/CF8/CF8M/CF3/CF3M

Applicable Medium: Water / Oil / Gas / Causticity Medium

Pressure Rating: 150LB-600LB

Size Range: 1/2" ~ 12"(DN15-DN300)

Partners

PTFE lined butterfly valve

Resilient seat butterfly valve

Double offset butterfly valve

Triple offset butterfly valve

Ball valve

Pipe fittings

Our Factory

Company Advantages

I business areas: fluid control products, technology and environmentally friendly products.

II Advanced CNC machining center, professional process unit, welding equipment, automatic assembly line and coating.

III China Standard Reference Unit, participating in the formulation of relevant valve industry standards.

IV We have established a research and development center in Houston, Texas, USA.

V product standards: GB, German standards, US standards, TUV CE, ISO 9001, ADWO-2000, TS, PED, WRC WRAS, KTW, API 6D, API609.

Six, the main production: butterfly valve, ball valve, gate valve, check valve, globe valve, pipe fittings, manual / pneumatic / electric actuators, valve accessories.

FAQ

Q: If I need a quote, what information do we need?

A: Valve material, temperature, pressure, medium, application system.

Q: Can you provide an actuator? What are you?

A: Pneumatic, electric, hydraulic, solenoid valves. The RKSfluid actuator uses US technology. You can tell us what you need.

Q: What is your production capacity?

A: There are four factories in RKSfluid that can provide the products you need.

Q: Production lead time

A: It takes 2~5 working days for ordinary products to be in stock. Customized according to your needs

Q: MOQ

A: All products are 1pc.

Q: How about quality assurance?

A: 100% quality inspection before delivery, 2 year warranty. Make sure your system is running safely.

We have obtained TUV, API, WRAS, CE, ISO certification.

The standard complies with DIN, ASME, BS EN, JIS, API, AWWA.

Q: How do you provide quality service to our customers?

A: RKSfluid has 20 years of experience and more than 70 R&D engineers provide technical support, model selection and installation instructions.
