RKSfluid was founded in 1997. We are a production workshop both for foundry and for processing, research and & development center and quality control center. Production the facilities include numerical control work centers, professional processing cells, broad spectrum welding equipment, automatic assembly and coating lines. We have created a design team, research and & development. Our new testing center as a testing center for public service platforms a Liaoning Province, Become the standard GB of the Chinese valve reference unit, to participate in developing the relevant valves industry standards. In order to speed up the overseas business expansion and resource integration, and to support the success of RKS fluid sales in the United States, Germany and Russia. We have an American agent. Our product design standards Coverage: GB, ISO, German and American standard, approved by TUV for CE and ADWO-2000, ISO9001, TS, API. Our products: manual, pneumatic and & electrically controlled ball valves Butterfly valves and gate valves. Check valves, automatic control valves. Castings and Fittings: valve bodies, hoods, disks, stems, gearbox, universal joints, flange adapters, Tapping Saddle: after years of development, we continue to improve and seek innovation while adhering to "proven technology, superior features and legendary value" like ours product value philosophy. Customer satisfaction is our business goal! RKSfluid was founded in 1997.
