

DESIGN FEATURES

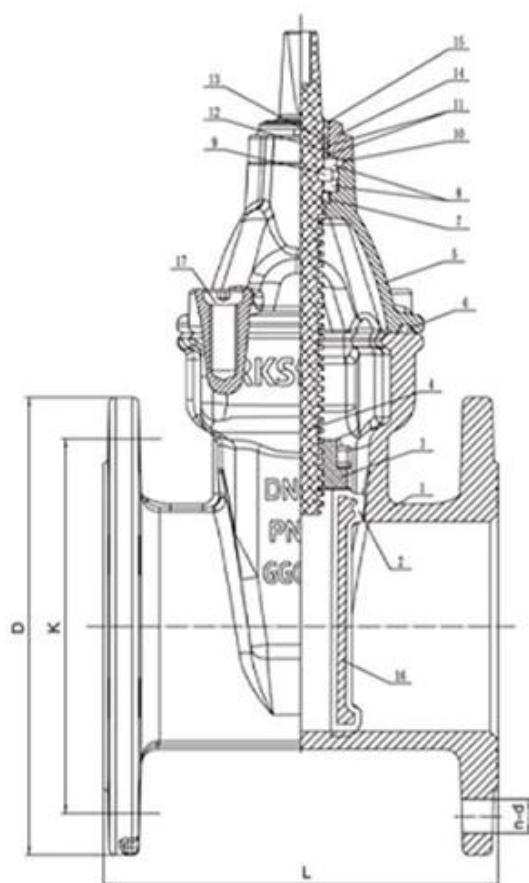

Features

- Use AkzoNobel material.
- Super Anti-corrosion
- Epoxy powder coating 200-250um,
- Baking varnish over 200°C,

NO.		
1	Body	GGG50
2	Dise	GGG40+EPDM
3	Wedge nut	C48600
4	Stem	SS431
5	Bonnet	GT450-10
6	Gasket	EPDM
7	Y-ring	EPDM85-90
8	Fix ring	CuZn21Si3/C69300
9	Thrust bearing	C69300
10	Seal ring	EPDM70
11	O ring	NBR
12	Retainer ring	POM
13	Bushing ring	POM
14	Gland	SS431
15	Dustproof ring	EPDM85
16	Dise core	GGG40
17	Bolt	SS316

Free wedge nut, reduces the stem bending forces and at the same time enables it to be easily replaced.

The more compact new cap, reduces the water retention areas in order to reduce the risk of bacterial growth.

One piece stainless steel stem in for better resistance to axial load and to with stand higher operating torques.

Three locking tab for bayonet system prevents self-dismantling.

Dust guard integrating three O-ring shape, prohibiting the introduction of foreign bodies at the stem.

Male guiding system with composite sliding skate reduces the wear of the wedge against the body, allowing a smooth functionality and a longer life time of the valve.

Triple seal at the operating stem to ensure tightness with the test of time (2500 cycles).

New male composite sliding skate technology ensuring a low operating torque even under high differential pressure and preventing damage or corrosion generated by the friction.

APPLICATION SCENARIO

Industrial water application

Power plant

Sea water desalination

Water treatment

Water supply and drainage

HAVC

Food and drug

Water transport

Q: What is the main product of your company?

A: Our main product is a high-pressure hydraulic pump, which is used in various industrial applications.

Q: What are the main features of your product?

A: Our product is a high-pressure hydraulic pump, which is used in various industrial applications. It has a high pressure rating, a high flow rate, and a long service life.

Q: What is the main application of your product?

A: Our product is a high-pressure hydraulic pump, which is used in various industrial applications. It is commonly used in the construction, mining, and manufacturing industries.

Q: What is the main advantage of your product?

A: Our product is a high-pressure hydraulic pump, which is used in various industrial applications. It has a high pressure rating, a high flow rate, and a long service life.

Q: What is the main disadvantage of your product?

A: Our product is a high-pressure hydraulic pump, which is used in various industrial applications. It has a high pressure rating, a high flow rate, and a long service life.

Q: What is the main certification of your product?

A: Our product is a high-pressure hydraulic pump, which is used in various industrial applications. It has a high pressure rating, a high flow rate, and a long service life.

A: Our product is a high-pressure hydraulic pump, which is used in various industrial applications. It has a high pressure rating, a high flow rate, and a long service life.

Our product is a high-pressure hydraulic pump, which is used in various industrial applications. It has a high pressure rating, a high flow rate, and a long service life.

Our product is a high-pressure hydraulic pump, which is used in various industrial applications. It has a high pressure rating, a high flow rate, and a long service life.

Our product is a high-pressure hydraulic pump, which is used in various industrial applications. It has a high pressure rating, a high flow rate, and a long service life.

Q: What is the main warranty of your product?
